

## Level transmitters Series LTDR

### TDR guided radar level transmitter for liquids and solids

- Level measurement independent of changing process conditions (density, conductivity, temperature, pressure,...)
- Innovative signal analysis and disturbance signal suppression
- Almost no installation restrictions
- Different types of probes: single rod, coaxial and rope probe, interchangeable thanks to its modular design
- Suitable for almost every liquid. Exceptional performance in liquids with low dielectric constant (i.e. low reflectivity) such as oils and hydrocarbons
- Suitable for solids, mainly with rope probe version
- Unmatched price / performance ratio
- Measuring range:
  - Single rod probe: 100 ... 3000 mm
  - Coaxial probe: 100 ... 6000 mm
  - Rope probe: 1000 ... 20000 mm
- Connections:
  - Rosca G $\frac{3}{4}$ A or G1A threaded connection
  - EN 1092-1 DN40 flange or bigger
- Materials: EN 1.4404 (AISI 316L), PEEK™
- 4-20 mA output
- 1 x programmable transistor output for level detection
- Optional:
  - ATEX version
  - Extended temperature version
  - Single rod PTFE coated

## Working principle

LTDR uses TDR (Time Domain Reflectometry) technology.

Low-energy, high-frequency electromagnetic impulses, generated by the sensor's circuitry, are propagated along the probe which is immersed in the liquid to be measured. When these impulses hit the surface of the liquid, part of the impulse energy is reflected back up the probe to the circuitry which then calculates the fluid level from the time difference between the impulses sent and the impulses reflected. The sensor can output the analyzed level as a continuous measurement reading through its analog output, or it can convert the values into freely positionable switching output signals.

LTDR Sensors are also known as Guided Radars or Guided Wave Radars.

## Applications

- Level measurement in tanks/storage silos
- Water and waste water treatment
- Food and beverage industry
- Chemical, petrochemical and car industry

## Models

- **LTDR single rod probe:**

- 6 mm, G $\frac{3}{4}$  connection
- 8 mm, G1 connection

- **LTDR rope probe:**

- 4 mm, G $\frac{3}{4}$  connection
- 6 mm, G1 connection

Suitable for a very wide range of applications with both liquids and solids (single rod 8 mm and rope probe are specifically indicated for the level measurement of solids).

The signal has wider detection radius around the rod. Thus, it is more responsive for measuring signal disturbances which can be easily overcome by observing a few mounting considerations and making simple configuration adjustments to the sensor.

These are also recommended for installation in metallic bypass chambers, which basically act together with the rod as a big coaxial probe.

- **LTDR coaxial probe:** G $\frac{3}{4}$  connection

The high frequency measurement signal is completely contained within the outer tube, which provides immunity against any external conditions and interfering objects outside its tube.

Ideal solution for a hassle-free "drop-in anywhere" installation, ensuring reliable measurement under almost any application condition. Ideal choice for measuring low reflectivity liquids (i.e. low dielectric constant) such as oils and hydrocarbons.

Recommended for the use with clean liquids only. NOT recommended with viscous, crystallizing, adhesive, coating or sticky liquids, fibrous liquids, sludge, slurry, pulp or any liquids containing solid particles. Such liquids might cause build-up, bridging or clogging inside the coaxial probe.

LTDR single rod probe

LTDR coaxial probe

### Technical data

- **Accuracy:**  $\pm 3$  mm
- **Repeatability:**  $< 2$  mm
- **Resolution:**  $< 1$  mm
- **Probe type:**
  - Single rod  $\varnothing 6$  or  $\varnothing 8$  mm
  - Coaxial  $\varnothing 17.2$  mm (standard tube: NPS  $\frac{3}{8}$  10S)
  - Rope  $\varnothing 4$  or  $\varnothing 6$  mm
- **Probe length (L):**
  - Single rod probe: 100 ... 3000 mm
  - Coaxial probe: 100 ... 6000 mm
  - Rope probe: 1000 ... 20000 mm
- **Inactive area:**
  - Top (I1):
    - Single rod probe:  $\epsilon_r=80$ : 50 mm /  $\epsilon_r=2$ : 80 mm
    - Coaxial probe:  $\epsilon_r=80$ : 30 mm /  $\epsilon_r=2$ : 50 mm
    - Rope probe:  $\epsilon_r=80$ : 50 mm /  $\epsilon_r=2$ : 80 mm
  - Bottom (I2):
    - Single rod probe:  $\epsilon_r=80$ : 10 mm /  $\epsilon_r=2$ : 50 mm
    - Coaxial probe:  $\epsilon_r=80$ : 10 mm /  $\epsilon_r=2$ : 50 mm
    - Rope probe:  $\epsilon_r=20$ : 10 mm /  $\epsilon_r=2$ : 50 mm
- **Measuring range (M):** probe length less both inactive areas at top and bottom
- **Switching point (S):** freely positionable within measuring range
- **Dielectric constant ( $\epsilon_r$ ):**
  - Single rod probe:  $> 1.8$
  - Coaxial probe:  $> 1.4$
  - Rope probe:  $> 1.8$
- **Conductivity & density:** no restrictions
- **Dynamic viscosity:**
  - Single rod probe:  $< 5000$  mPa·s = 5000 cP
  - Coaxial probe:  $< 500$  mPa·s = 500 cP
  - Rope probe:  $< 5000$  mPa·s = 5000 cP
- **Fluid temperature:**
  - Single rod / rope probe:  $-40^\circ\text{C} \dots +150^\circ\text{C}$
  - Single rod PTFE coated:  $-15^\circ\text{C} \dots +100^\circ\text{C}$
  - Coaxial probe EPDM seal:  $-40^\circ\text{C} \dots +130^\circ\text{C}$
  - Coaxial probe VITON® seal:  $-15^\circ\text{C} \dots +150^\circ\text{C}$
  - Special version:  $-200^\circ\text{C} \dots +250^\circ\text{C}$   
Available for single rod and coaxial probe up to 1000 mm ( $-150^\circ\text{C} \dots +250^\circ\text{C}$  with VITON® seal)
- **Ambient temperature:**  $-25^\circ\text{C} \dots +80^\circ\text{C}$   
(storage:  $-40^\circ\text{C} \dots +85^\circ\text{C}$ )
- **Working pressure:**  $-1$  bar ... 40 bar  
(single rod PTFE coated 0 ... 4 bar)
- **Material exposed to tank atmosphere:**
  - Single rod probe:
    - EN 1.4404 (AISI 316L), PEEK™
    - PTFE coating (VITON® seal)
  - Coaxial probe: EN 1.4404 (AISI 316L), PEEK™  
O-ring seal: EPDM or VITON®  
(other o-ring materials on request)
  - Rope probe: EN 1.4404 (AISI 316L), PEEK™  
Gasket at connection thread: BELPA® CSA-50, 2 mm thick
- **Housing materials:**
  - Housing body and cover: coated aluminium alloy  
(epoxy coated for ATEX version)
  - Cover o-ring seal: NBR or silicone (ATEX version)  
Other materials on request
- **Ingress protection:** IP65 (standard housing) / IP68 10 m H<sub>2</sub>O, NEMA6P (ATEX version)
- **Cable entries:**
  - Standard version: 2 cable entries M16x1.5
  - ATEX version: 2 cable entries M20x1.5  
Other sizes on request
- **Connection thread (CT),** according to selected probe:
  - G $\frac{3}{4}$ A: single rod 6 mm, rope probe 4 mm and coaxial probe
  - G1A: single rod 8 mm and rope probe 6 mm  
EN 1092-1 flange or other connections on request
- **Power supply:** 12 ... 30VDC (reverse-polarity protected), 4-wire system
- **Power consumption:**  $< 70$  mA at 24VDC (no burden)
- **Electronics completely galvanically insulated** from inputs/ outputs and tank potential, thus avoiding any problems from electrochemical corrosion protection of the tank
- **Analog output (active):** current output 4-20mA
  - Total load resistance:  $< 500 \Omega$ : HART resistor approx. 250  $\Omega$  + load resistance approx. 250  $\Omega$ .
  - Response time: 0.5 s, 2 s and 5 s (selectable)
  - Temperature drift:  $< 0.2$  mm/K in ambient temperature
- **Switching output DC PNP (active):** NC or NO (shortcircuit protected)
  - Load current:  $< 200$  mA
  - Signal voltage HIGH: supply voltage -2V
  - Signal voltage LOW: 0V ... 1V
  - Response time:  $< 100$  ms
- **Start up time:**  $< 6$  s
- **Cable terminals:**
  - Screwless, cage clamp terminal block for stranded and solid wires 0.5 ... 2 mm<sup>2</sup>
  - The usage of cable and sleeves with insulation collar is not recommended
- **ATEX certification**

## Dimensions

### Single rod, threaded connection

### Coaxial probe, threaded connection

#### Weight of the components:

- Standard housing: 1240 g
- ATEX housing: 950 g
- Single rod probe, 1m: 230 g
- Complete coaxial probe, 1m: 770 g

# Level transmitters

## Series LTDR

### Rope probe, threaded connection

S freely positionable within the measuring range M

S freely positionable within the measuring range M

### ATEX version

### Single rod, flanged connection

### Coaxial probe, flanged connection

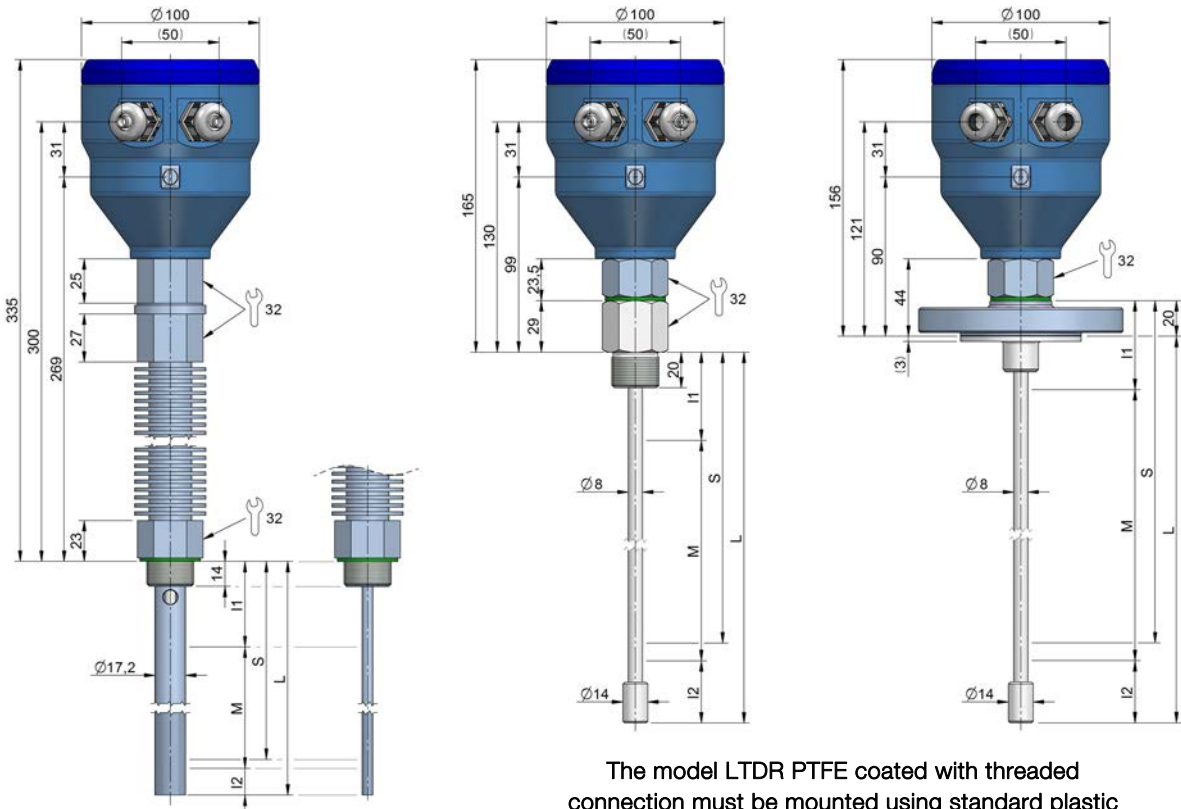

# Level transmitters

## Series LTDR

### Rope probe, flanged connection

### Extended temperature version, threaded connection, and PTFE coated, threaded and flanged connection

The model LTDR PTFE coated with threaded connection must be mounted using standard plastic connectors. Do not mount in metallic flanges.

## ATEX version

The ATEX version of the LTDR is suitable for applications with hazardous gas or dust atmospheres, for applications requiring instruments of category 1/2G, 1/2D or 2G, 2D.

The installation of electrical equipment in hazardous areas must always be carried out by qualified personnel.

The approval certificate is in accordance to:

**CE** 0158 SEV 09 ATEX 0171 X

and the different markings are:

- II 1/2G Ex ia/d IIC T6
- II 1/2D Ex iaD/tD A20/21 IP68 T86°C
- II 2G Ex ia d IIC T6
- II 2D Ex iaD tD A21 IP68 T86°C
- II 1/2G Ex ia/d IIC T6 Ga/Gb
- II 1/2D Ex ia/t IIIC T86°C Da/Db
- II 2G Ex ia d IIC T6 Gb
- II 2D Ex ia t IIIC T86°C Db

## Configuration

Basic configuration of LTDR can be done directly on the device via a DIP switch, a single push button and visual feedback from a LED.

All settings required to get LTDR fully operational can be performed directly on the device. The LTDR can also be ordered completely pre-configured.

For greater convenience, remote configuration, and extensive diagnostics, a simple spread sheet can be provided through which the configuration can be done.

A standard HART modem is required for communication between computer and sensor. Communication is done via a digital HART signal that is superimposed onto the analog 4-20 mA signal of the current output.

## Technical data

- Power supply:  $U = 12 \dots 30 \text{ VDC}$  ;  $U_m = 250 \text{ VAC}$
- Analog output:  $I = 4\text{-}20 \text{ mA}$  ;  $U_m = 250 \text{ VAC}$
- Switch output:  $U_s = 0 \dots U$  ;  $U_m = 250 \text{ VAC}$

## Temperatures

Temperature class	Application temperature	Ambient temperature
CATEGORY 1/2G		
T1 ... T6	-20°C ... +60°C	-40°C ... +70°C
CATEGORY 2G		
T6	-40°C ... +85°C	
T5	-40°C ... +100°C	
T4	-40°C ... +135°C	-40°C ... +70°C
T1 ... T3	-40°C ... +150°C	
CATEGORY 1/2D Y 2D		
Max. temperature: +86°C		-40°C ... +70°C

## Installation

LTDR is mounted vertically to the tank via its connection thread, which is screwed directly into a standard threaded tank connection, i.e. weld in socket, or it can be screwed into a flange, which is then connected to a tank nozzle.

The customer has to ensure proper temperature and pressure ratings for his application and has to select the appropriate seal to connect the sensor (LTDR standard seal material is BELPA® CSA-50 for G $\frac{3}{4}$ A connection thread).

LTDR is well suited for side mounting into a tank. In addition, LTDR is also the ideal combination with TECFLUID series LT level gauges, SS models, in order to have a local indication of the level and an associated transmitter. In these cases the recommended probe type is the single rod probe. The chamber acts as an external tube of a coaxial probe (see figures page 9).

Standard installation LTDR transmitter
